Brief Overview

The AAPL Field Land Practices seminar(formerly Introduction to Field Land Practices) is a two-day program designed for the six-month to five-year landman, and is well suited for both the field landman and the in-house landman wanting to learn more about field land practices. It can serve as a primer for those starting out in field landwork, as a refresher and general review for the more experienced landman, or as an opportunity for the company landman to learn more about field landwork. The material presented will build on the foundation acquired on-the-job and will solidify skills recently acquired. It is also suitable for those interested in learning some of the basics of landwork and what a landman does. A course workbook will be provided. An optional RPL exam is now offered on Day Two (details below).
